

May 6, 1975

operation of state government. And so I would be hopeful that Senator Chambers would recognize this is not taxation without representation. This tax, this bill is being paid today already. It is a way of saving those people who own no automobiles that portion that they would have to pay on my license plates. It is just as simple as that and I would be hopeful that this bill would not be indefinitely postponed because I don't like to see this money come from the state General Fund or..nor especially from the Highway Fund.

SPEAKER: The Chair recognizes Senator Schmit.

SENATOR SCHMIT: Mr. President, members of the Legislature, one of the many inefficiencies that we recognize in government is the fact that when someone makes a comment on this floor, by the time you get a chance to speak that individual is long gone and you have lost your enthusiasm for the comments. I wish Senator Chambers would be back here now. He always riles me when he makes his comments about freedom from tyranny. Good to see you, Senator. But in any case, I would just like to say this. I think Senator Chambers sort of drifted far afield in his opposition to the bill. At this time, I certainly would not vote to kill the bill. I just like to say and I know that there are times when all of us get carried away but when we talk...when Senator Chambers says he is going to tell how bad this country is and how little respect that the elected people have for the citizens of the country, I want to say this and I have been threatening to say it time and time again. I am going to say now that I don't think that we are abridging anyone's rights if we decide that we need to raise the cost of the license plate two bucks and any country which we have here today and we have this state of Nebraska and we have this government which was established for the governing of the citizens of the state of Nebraska but right here, when this...when the University of Nebraska will invite to its campus someone with whom I disagree as much as I disagree with Angela Davis and pay her a \$2,000 fee, then I don't think that we have a tyrannical form of government and I would hope that, by golly, at this point in time, we would not kill the bill.

SPEAKER: The Chair recognizes Senator Kelly.

SENATOR KELLY: Mr. President, members of the Legislature, I, specifically, request the attention of the citizens in the 35th District of the Nebraska Unicameral. Your representative, whether it is good or bad, is here. You are represented in this measure and you will vote. You will recognize your vote because of my name. In reality, instead of my name being on the Board, it should read the 35th District because there must be a finger to push the button and 30,308, just from a practical point of view, cannot do that and our government is dedicated to representative government and I am, momentarily, am holding one of those spots and I hold it dearly. I do vote. I do attend and you people in the 35th District are represented, and if my representation of you people is tyranny, recognize it for what it is, tyranny. I recognize it, personally, as hard work, dedication, thought and study to see what these bills are about and to do my level best, as a human, to represent
